SDI Displays Ltd create, make and supply bespoke retail and POS displays from two manufacturing sites in Copt Oak and Foxton.

As a responsible organisation we intend to grow and develop in a sustainable manner. However, we recognise that our operations have an impact on the environment and we are committed to reducing these, and to continually improving our environmental performance.

SDI Displays Ltd will operate an Environmental Management System (EMS) that will achieve and maintain ISO14001 accreditation.

The management team will provide a framework for setting and reviewing environmental objectives and targets, and will provide the human and financial resources required to implement this EMS.

It is our Policy to:

- integrate environmental management into our day-to-day operations to ensure environmental issues are addressed;
- use waste contractors that have a zero-to-landfill approach for general waste;
- comply with all relevant environmental legislation, regulations and requirements which relate to our environmental aspects;
- reduce our use of natural resources such as energy;
- re-use resources whenever possible rather than dispose of them,
- encourage the use of recycled materials and recycling initiatives;
- prevent pollution by reducing emissions and discharges;
- provide appropriate environmental training for all our people and encourage them to support this programme;
- promote communication with internal and external interested parties and respond appropriately to reasonable requests for information about our environmental performance;
- ensure that all our stakeholders and the general public can access our policy.
